

# YFK-9301G (PP-film)

## Specifications

<b>Appearance</b>	White or light yellow columnar particles
<b>Volatile Loss %</b>	<= 2.0
<b>Alkylphenol %</b>	<= 2.0
<b>Particle Size (mm)</b>	2.0 ~ 3.0

## Usage Notes

<b>Ingredients</b>	Antioxidant 1010, antioxidant 626, antioxidant 168, acid absorber and other components in a certain proportion, mixed and granulated by a special process.
<b>Properties</b>	It is supplied as white or light-yellow columnar particles with stable properties.
<b>Performance</b>	It provides outstanding processing stability and long-term protection for BOPP film products. Additionally, it significantly reduces dust generation during processing, minimizing operator exposure and improving workplace safety.
<b>Applications</b>	It is a high-performance high-temperature antioxidant with good light stability. It provides excellent processing stability and color retention for BOPP film products. The additive is suitable for BOPP films requiring high-temperature processing and strong color protection, and it performs effectively in applications involving repeated high-temperature extrusion.
<b>Storage</b>	This product is stable under normal conditions and does not have any special storage requirements. However, it should be protected from moisture and heat.
<b>Packaging</b>	The product is packaged in cardboard boxes lined with aluminum foil bags. The net weight per unit is 25 kg. Customized packaging is available.
